Belize's rich talent pool

The official language in Belize is English, but our location in Central America has created a bi-lingual nation and hence Clear Call can offer services in both English and Spanish.

Our staff, which reflects the culturally diverse population of Belize, speak English and/or Spanish fluently with a neutral accent. Belizeans have a good work ethic and Clear Call Belize is run to the highest ethical standards. We provide employees with a positive and friendly, but disciplined and focused work environment with financial and other incentives and opportunities for career advancement.

Belize's strategic location

With daily flights and connections into Belize from many US cities, you can be in Belize within a few hours. This enables you to visit us regularly and easily.

Belize does not adjust for Daylight Savings Time, so during the summer our local time is two hours behind EST and during the winter our local time is one hour behind EST. This means time zone differences don't interfere with communication.

Clear Call Belize is Belizean owned and registered with a well-rounded board of directors with experience in technology and international business. We are familiar with and compliant to US and UK tax and other laws.

Our population typically have friends or relatives living in the US and the magazines they read, the music they enjoy and the TV and movies they watch are generally from the US giving our staff a good understanding of American culture, accents and speech.

As well as having a diverse society comprised of many cultures and languages, Belize also has a very diverse history, landscape, flora and fauna and boasts the largest barrier reef system in the Western Hemisphere. Belize has scores of natural and manmade landmarks, historical and cultural sites, reefs, beaches, rainforests and trails, and sporting activities. This means your business trips can always have an element of fun and relaxation.
